## ENERGY POINTS DISCUSS WITH WORKERS DURING ENERGY TRAINING

| | | |
|---|---|---|
| **Introduction to Energy Management:** | Importance of energy management | Explain the environmental and economic benefits of energy conservation.<br><br>Discuss the impact of energy consumption on the company's bottom line and sustainability goals.<br><br>Highlight the role of employees in achieving energy efficiency.<br><br>Energy sources and uses:<br>Provide an overview of different energy sources (electricity, natural gas, etc.) and their typical uses in the workplace.<br><br>Discuss the concept of energy efficiency and its importance in reducing energy consumption. |
| **Energy Saving Practices in The Workplace** | Lighting | Turning off lights when leaving a room or when natural light is sufficient.<br>Utilizing task lighting instead of overhead lighting when possible.<br><br>Reporting burned-out bulbs promptly for replacement with energy-efficient alternatives |

| | | |
|---|---|---|
| | | (LEDs). |
| | Office Equipment: | Powering down computers, monitors, printers, and other equipment when not in use.<br>Enabling energy-saving features like sleep mode and hibernation.<br><br>Unplugging chargers and other devices when not in use to avoid |
| **Phantom Energy Brain.** | Heating, Ventilation, and Air Conditioning (HVAC): | Setting thermostats to optimal temperatures for energy efficiency (e.g., slightly higher in summer and lower in wire porting any HVAC issues promptly for maintenance and repair.<br><br>Closing windows and doors when heating or cooling is in use.<br><br>Utilizing natural ventilation when weather conditions permit.<br><br>Manufacturing Equipment and Processes:<br><br>Optimizing equipment operation and scheduling to minimize energy |

| | | |
|---|---|---|
| | consumption. | Implementing energy-efficient technologies and processes.<br><br>Maintaining equipment regularly to ensure optimal performance and |
| Prevent Energy Waste. | Transportation | Promoting carpooling, using public transportation, or cycling/walking for commuting.<br><br>Optimizing delivery routes and vehicle loads to reduce fuel consumption. |
| Energy Monitoring and Reporting: | Understanding energy bills | Explain how to read and interpret energy bills to identify usage patterns and potential areas for improvement.<br><br>Reporting energy waste:<br><br>Encourage employees to report any energy waste they observe, such as leaks, malfunctioning equipment, or inefficient practices.<br><br>Employee suggestion programs:<br><br>Establish a platform for employees to contribute ideas and suggestions for energy-saving initiatives. |
