HR Process

This document describes the Human Resource (HR) processes implemented in the manufacturing unit to ensure proper manpower planning, employee skill development, attendance monitoring, safety compliance, performance review, and statutory compliance. The HR system supports smooth manufacturing operations, worker discipline, and continuous improvement.

1. Objective

To establish and maintain an effective HR process for recruitment, training, attendance, employee welfare, and performance monitoring in the organization.

2. Scope

This process applies to all employees including operators, helpers, supervisors, quality inspectors, maintenance staff, and office personnel.

3. HR Process Flow

- Manpower Requirement Identification
- Recruitment and Selection
- Joining and Documentation
- Induction and Safety Training
- Skill Development and On-the-Job Training
- Attendance and Leave Monitoring
- Performance Review
- Employee Welfare and Grievance Handling
- Periodic Review by Management

4. Recruitment and Selection Process

Whenever manpower is required in production or quality departments, the department head raises a manpower request. Candidates are shortlisted based on experience in cutting tool manufacturing, machine operation, grinding, CNC operation, or inspection activities. Selected candidates undergo an interview and skill assessment before final selection.

5. Training and Skill Development

All newly joined operators receive induction training covering company rules, machine safety, PPE usage, quality standards, and housekeeping requirements. On-the-job training is provided by supervisors for Fixture manufacturing, cutting tool inspection, tool handling, and measuring instruments.

Training Topic	Department	Frequency	Responsible Person
Machine Safety	Production	Monthly	Production Supervisor
PPE Awareness	All Departments	Monthly	HR & Safety Officer
Quality Inspection	Quality	Quarterly	Quality Manager
5S & Housekeeping	Production	Weekly	Line Supervisor

6. Attendance and Employee Monitoring

Employee attendance is monitored daily through attendance registers. Leave records, overtime details, and shift allocation are maintained by the HR department. Any absenteeism or discipline issue is reviewed by the department supervisor.

7. Employee Welfare and Safety

The company provides safe working conditions, drinking water, first aid facilities, washrooms, PPE, and rest areas for employees. Regular safety awareness sessions are conducted to prevent workplace injuries.

8. Performance Review System

Employee performance is reviewed periodically based on productivity, rejection rate, attendance, discipline, and adherence to quality standards. Improvement actions and additional training are provided wherever required.

9. HR Monitoring Record

Employee Name	Department	Attendance %	Training Completed	Supervisor Remarks
	Production	98%	Machine Safety	Good Performance
	Quality	96%	Inspection Training	Needs Improvement in Documentation

10. Management Review

Senior management periodically reviews manpower availability, training effectiveness, employee performance, and statutory compliance. Necessary corrective actions are initiated through the HR and departmental heads.
